Can we bathe the world?

Bathing is the cheapest and most potent health intervention on earth. Bathing offers global health benefits greater than any pharmaceutical drug, vaccine, or any other medical technology.
Access to bathing water is a critical health issue

1 in 3 people on earth cannot bathe and nearly 1000 children die each day from waterborne disease.

Everyday women spend 200 million hrs gathering water. To them water is time, education and hope.
World Bathing Day - June 22nd

www.worldbathingday.org

Petition the United Nations to declare June 22nd World Bathing Day: Please sign the petition at bathetheworld.org

In 2018 and 2019 WBD was celebrated at hot springs around the world and we are planning for 2020 and beyond. The aim is to include as many countries as possible and people from all nations involved.
World Bathing Day - June 22nd

Hot springs around the world are encouraged to host World Bathing Day events and post pictures using the hashtag #worldbathingday.
Bathe the World Event –

An event where people from all nations will bathe together. Hosted by the world’s oldest culture, at the largest hot spring on earth, situated in the remotest location, on the driest continent.
On 22 June, 2022, Witjira National Park, South Australia will host an event where one person from every nation on earth will bathe together in the world’s largest thermal spring.

Traditionally known as ‘Irwanyere’, or ‘healing waters’, Dalhousie Hot Springs is located on the sacred land of the Lower Southern Arrernte and Wangkangurru people in the Witjira National Park. This is situated on the edge of the Simpson desert in one of the world’s remotest locations, in the heart of the world’s driest continent.
